

O¹ Managed Direct Internet Access

Fast, Cost-Effective and Scalable

O¹'s Direct Internet Access (DIA) provides businesses with a fast, reliable and secure T1 Internet connection. An "always on" dedicated access is a perfect solution for companies with heavy Internet use and multiple users who require a high level of security and reliability. O¹'s DIA is also recommended for companies that use bandwidth-consuming applications such as e-commerce, or for any business running its own servers. Having a dedicated connection to the Internet enables businesses to easily increase bandwidth when needed.

Features

- Direct Internet Access up to 6MB for multiple T1s or DS3 up to 45MB
- Up to 8 IP addresses (5 usable)
- O¹ Managed router
 - 24 x 7 Monitoring for connectivity
 - Automatic notification of outages provided by Network Operations Center (NOC)
 - Proactive troubleshooting initiation
 - Electronic notifications (if requested)
- Web hosting
 - 50M storage ▪ 50 GB transfer
 - 1 Domain name ▪ 50 Email addresses

Benefits

- High-speed, "always on" Internet access
- T1 through full DS3 availability
- Bond multiple T1s together, as needed
- A reliable connection to O¹'s leading edge IP network
- Scalable to increase bandwidth as needs change
- Dramatically reduce data costs
- 24 x 7 Network monitoring
